SYDNEY NSW 2000

Dear Sir / Madam

DRILLING OF EASTERN IRON LENSES AT THE WELD RANGES COMMENCES

Hampton Hill Mining NL has been informed by our joint venture manager, Midwest Corporation Ltd. ("Midwest"), that the drill testing of the three main eastern lenses of the Hampton Hill Joint Venture (HHJV) tenements has commenced and the first six Reverse Circulation (RC) holes into Lens W29 have been completed.

The initial program will involve RC drilling of Lenses W29, W6 and W20 augmented by Diamond drilling at Lenses W6 and W20. Further RC and Diamond drilling programs will then be carried out with the total metreage dependant on results received.

Midwest have previously advised that W6 and W20 iron ore lenses located on tenement E20/641 have a combined exploration target range of between 35 and 45 million tonnes of direct shipping ore(DSO).

Yours faithfully

Joshua Pitt
Director

COMPLIANCE STATEMENT

The information in the above announcement that relates to exploration results has been reviewed and confirmed as accurate by Mr Wilson Forte who is a member of the AusIMM. Mr Forte is a full-time employee of the Company and has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Forte consents to the inclusion in the report of the matters based on his information in the form and context in which they appear.
